

LENDING CLUB CASE STUDY

TOPIC: LOAN REQUESTS

GROUP FACILITATOR NAME: SAJAL TIWARI

GITHUB: <https://github.com/sajalT05/Lending-Club-Case-Study-upgrad>

TEAM MEMBERS: SAJAL TIWARI & SHYAM SUNDAR SHUKLA

BATCH: JULY 2022

**TARGET
VARIABLE**

Target Variable (Original)

Column: loan_status

Description: Current status of the loan

Target Variable (Transformed)

New Categories:

1. Fully paid.
2. Charged off.

Removed records of "Current" loans

FEATURE VARIABLE SELECTION

Insights on Feature Selection

Method:

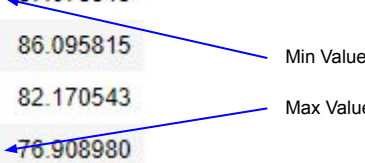

1. Variables capturing High variation between lowest and highest proportion percentage for 'charged off' situations.
2. Have linear relationship or identifiable relationship with percentage of Defaults.
3. For continuous variables, categorisation in sets or binning is done to get variation.

Insights on Feature Selection (contd.)

Example - loan amount variable

1. Loan amount categorised into different bins
2. The MIN value of percentage of “Charged Off” is taken across all bins
3. The MAX value of percentage of “Charged Off” is taken across all bins
4. The difference between the max and min values gives the variation captured by this variable for “Charged Off” percentage in the entire population

loan_status	Charged Off	Fully Paid
loan_amnt		
(-0.001, 5000.0]	13.953739	86.046261
(5000.0, 10000.0]	12.921485	87.078515
(10000.0, 15000.0]	13.904185	86.095815
(15000.0, 20000.0]	17.829457	82.170543
(20000.0, 29500.0]	23.091020	76.908980

Min Value

Max Value

sub_grade	45.69
int_rate	32.60
grade	29.27
pub_rec_bankruptcies	25.93
loan_amnt	24.39
loan_difference	24.39
funded_amnt	23.78
home_ownership	17.98
annual_inc	17.89
purpose	16.90
term	14.19
funded_amnt_inv	13.85
addr_state	10.28
emp_length	9.24
zip_code	4.87
dti_new	4.47
dti	4.41
verification_status	4.04
issue_d	3.79
installment	2.49

Most Significant Features Identified:

1. Sub grade.
2. Interest rate
3. Publicly recorded bankruptcies.
4. Purpose.
5. term.

Sub Grades

Information

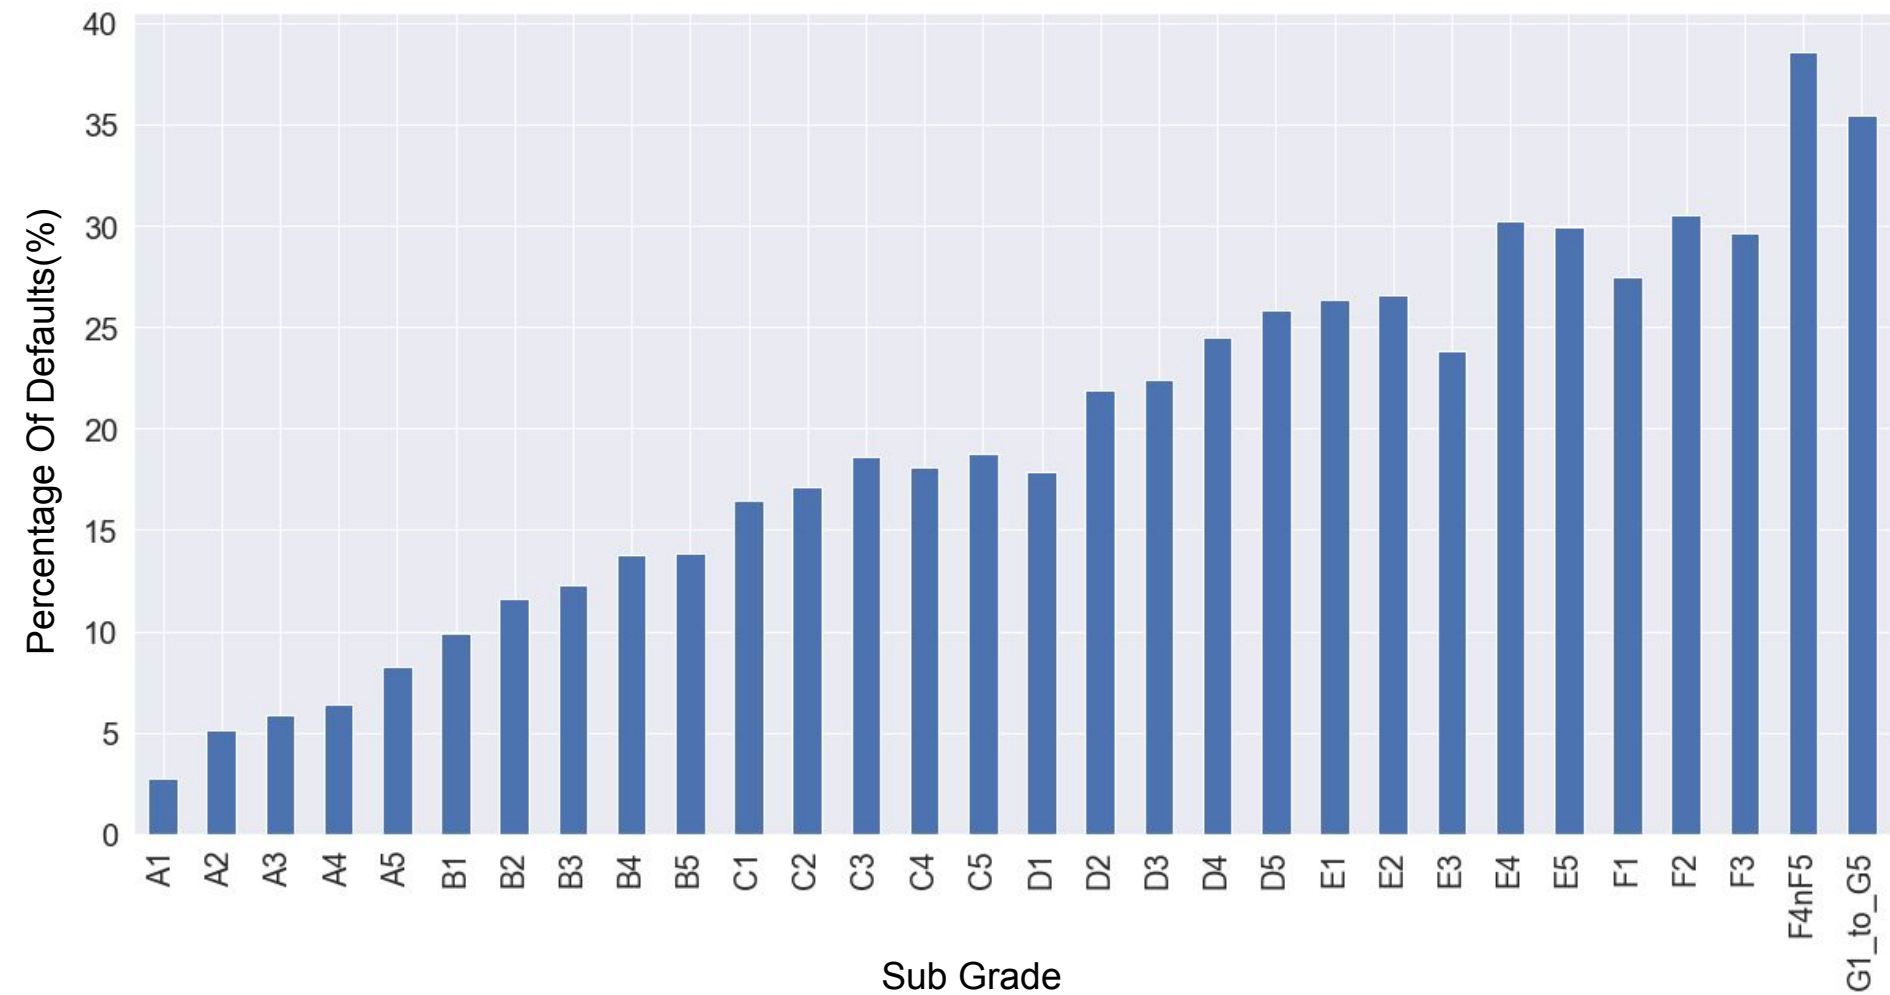

Column: sub_grade

Description: LC assigned loan subgrade

NOTE: Before further analysis, F4 and F5 categories are combined and all G categories combined into a single category as the samples size for each was low.

value counts -- 35

Analysis

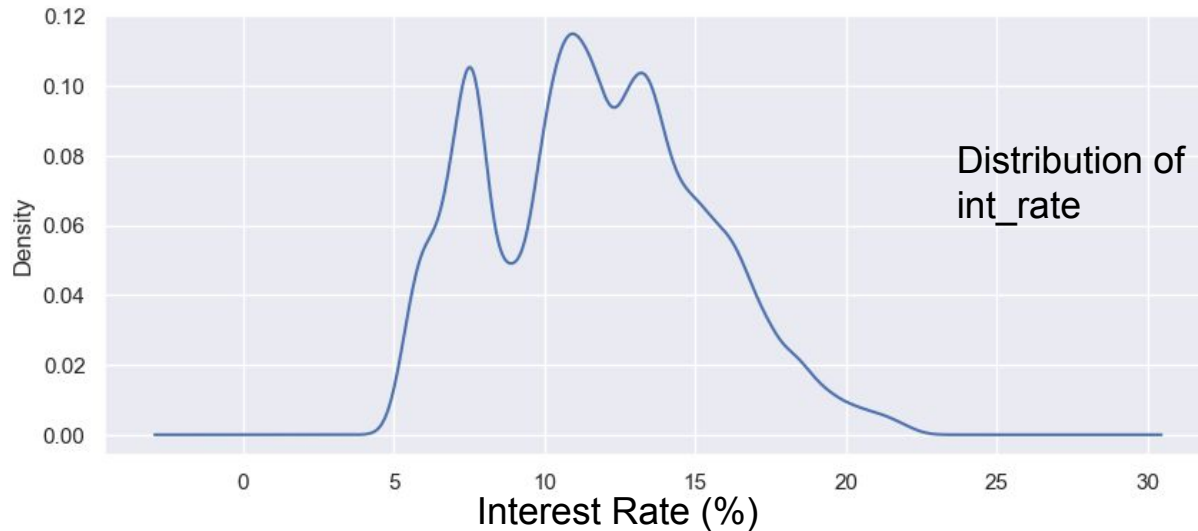

- observation
 - Chances of committing default increases with higher grades.
 - all sub grades with 'F' and 'G' have almost 40% chances of committing default.
- recommendation
 - if sub-grade assigned while reviewing loans is higher, reject loan requests.

Interest Rate

Information

Column: int_rate

Description: Interest Rate on the loan.

Mean interest rate: 11.78%
Median interest rate: 11.71%
Mode of interest rate: 10.99%

Analysis

- observation
 - Chances of committing default increases with interest rate.
- recommendation
 - customer taking loans at higher interest may commit default easily, approve loans only at low loan amount.

Publicly Recorded Bankruptcies

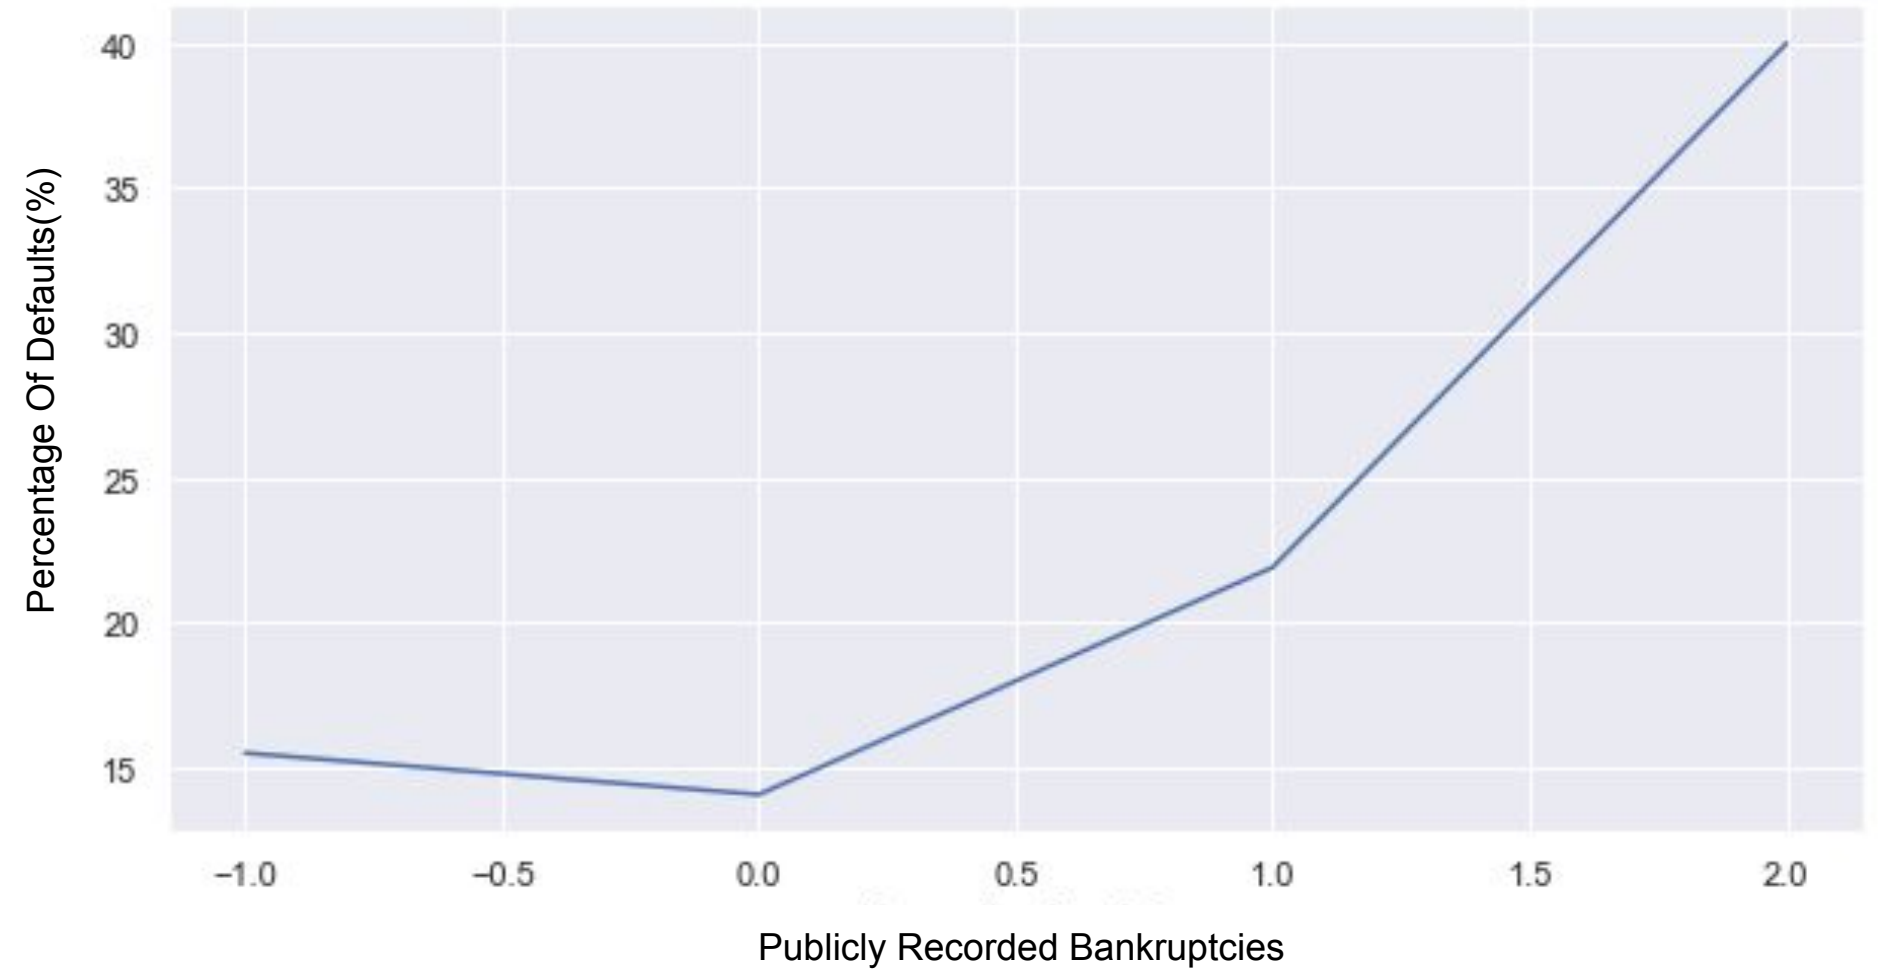

Information

Column: pub_rec_bankruptcies

Description: Number of public record bankruptcies

"-1": Data Not available

Publicly Recorded Bankruptcies

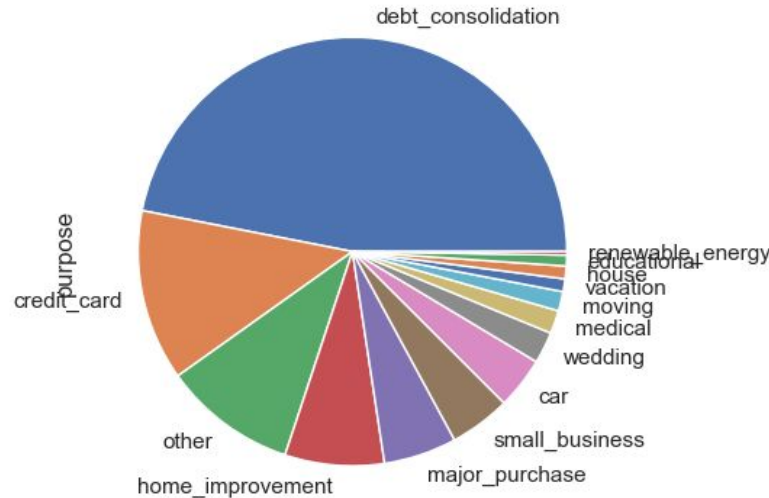

- observation
 - Chances of committing default increases with increase in publicly recorded bankruptcies.
 - People with 2 publicly recorded bankruptcies stand out with 40% chance of committing default on the loan.
- recommendation
 - People with 2 publicly recorded bankruptcies should be avoided for loan approval.

Purpose

Information

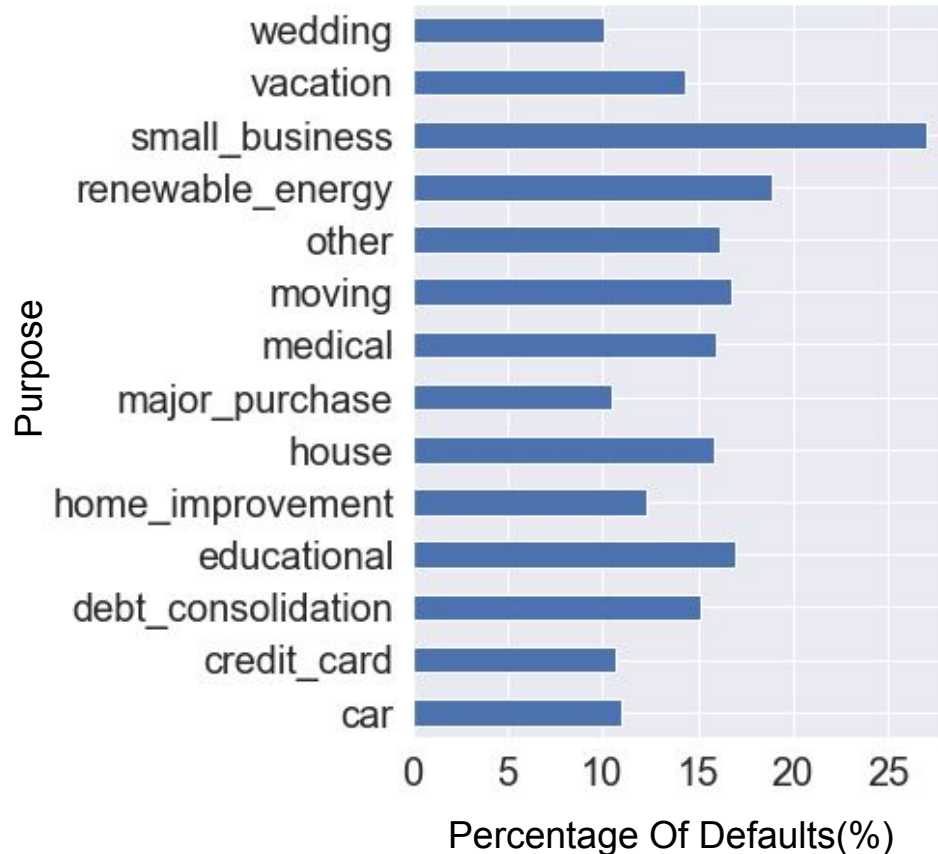

Column: purpose

Description: A category provided by the borrower for the loan request.

value counts -- 14

Variation of rate of default across different Purpose categories

Analysis

- observation
 - Chances of committing default more with selected categories of “purpose” of loan request
- recommendation
 - take precautions for loan requests for specific purpose:
 - small business : take necessary precautions and follow certain protocols.
 - renewable energy : reject loans or assess project
 - vacation : approve loans of small amount.
 - education : check institute and course information before approving loan.
 - debt consolidation : approve only small amount loans.
 - house : check property value resale before approving loans.

Term

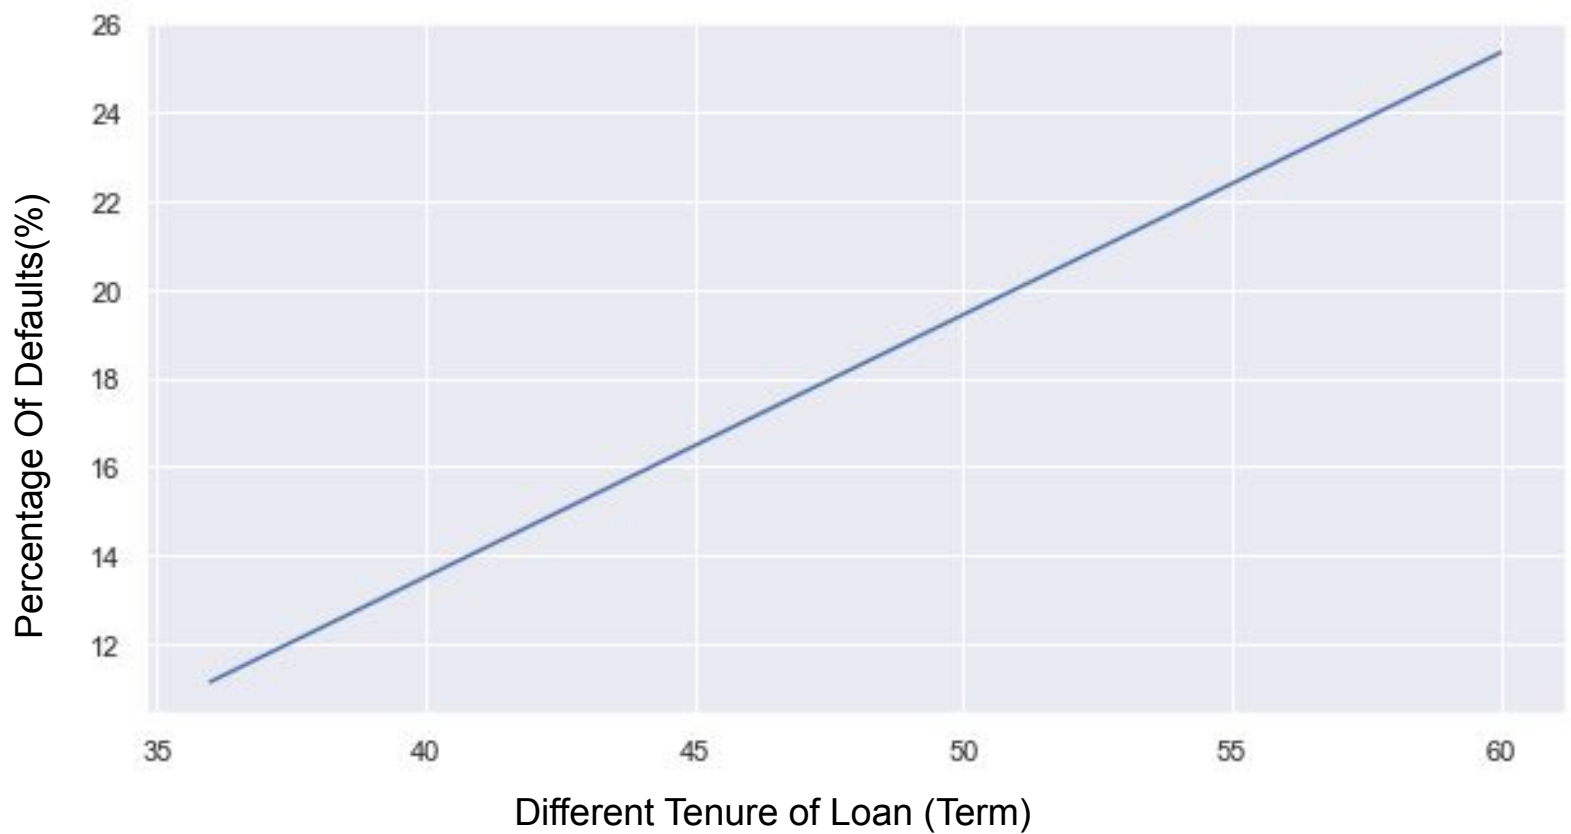

Information

Column: term

Description: The number of payments on the loan. Values are in months and can be either 36 or 60.

Variation of rate of default with Term

Description

- observation
 - Chances of committing default more with 60 month term.
- recommendation
 - approve loans mostly for 36 months.
 - Certain attractions such as lower interest can be given to the user to switch to lower term of 36 months
